Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Japanese patent in view of Nallinger and the "Admitted Prior Art". The Japanese patent discloses the claimed invention except for the vertically elongated outlet vertically arrayed on the dashboard. Nallinger teaches that it is known to provide a window defrosting installation with a nozzle mouth as set forth at column 2, lines 41 and 42. It would have been obvious to one having ordinary skill in the art at the time the invention was made for the boarding door window glass panes demisting duct of the Japanese patent to be a vertically elongated outlet, as taught by Nallinger in order to defrost over the entire height of the window pane. As to the structure of the bus, by applicant indication that the system is used in combination with a school bus is considered to be an admission that the system is for a "school bus". Hence, it is obvious for the bus of the Japanese patent to have the same structures of a school bus since they are equivalent vehicles. Note, also that even without the conventional school bus, the bus of the Japanese patent is considered to possess the same claimed structural features as the school bus.

Allowable Subject Matter

3. Claims 1-4 are allowed.

Response to Arguments

4. Applicant's arguments filed July 19, 2004 have been fully considered but they are not persuasive as to the rejection of claims 6 and 7. Contrary to applicant's remark, the vertically elongated outlet of Nallinger does extend from the dashboard. Note, there is no requirement in the claim that the outlet has to be in communication with an opening in the dashboard.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
